March hath XXXI. days.

*The Glorious Sun now ushers in the Spring.
And Birds Harmoniously it's welcome sing.
Each thing revives on Land, as in the Seas,
And Sick men now are sensible of Ease.*

An Astrologo-Physicial Discourse.

THat the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of these humours, is caused by the various and different Aspects and Positions of the Stars is even by Hippocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for the advantage for the sick;

Let the	{	Sanguine	{	bleed the ☾ being in	{	♄, or ♀.
		Cholerick				♅, or ♄.
		Phlegmatick				♆, or ♁.
		Melancholly				♁, ♁, or ♄.

But let her be also in the Aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Elestuaries, when the ☾ is in ♅; with Pills, when she is in ♄; with Poriions, when in ♄, because then posited as before directed.

Vomits are unsafe for all sorts of complections and constitutions; yet sometimes there is a necessity for them; as when the Distemper lyeth above the Stomach; it being impossible for a Purge, or any purgative Medicine thence to carry it; but when there is an occasion they may be safely taken when the ☾ is in ♄, ♁, or ♆ in any good Aspect of ♄, ♁, or ♅.

Glysters are most conveniently administred, when the ☾ is in ♄, ♁, or ♁, posited as before.

Good to stop Fluxes, or Rheumos, or Issues, when the ☾ is in any of the Earthly Signs, viz. ♄, ♁, or ♄; of which experience is a valuable witness.

Very proper to Bath, when the ☾ is in ♅, ♁, ♁, or ♄, in Aspect of ♄, or ♁.

Convenient to cut Hair, the ☾ being in ♁, ♆, ♁, or ♄, increasing in Light. And although this be in the opinion of many but a Trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus Locks; But they, it may be, esteem it an Honour to be made amends with a part of her, that Originally injured them.

Medicina a medico; medela ab altissimo.

Sundry. Excellent Astrological

Rules to be Observed in Agriculture, Husbandry, &c. according to *Clandius Darios*, and other Learned Astrologers, Physicians, and Philosophers.

IT is not unknown (but by daily Experience demonstrated) to those of Cain's Profession, (viz. Tillers of the Ground) that all Plants, Seeds, and other things, which are produced out of the Bowels of the Earth, (having her for their common Parent, as it were) do receive both Increase and Decrease by the motion, and position of the Moon, and therefore it is, that the careful Husbandman in sowing Seeds, planting Trees, grafting Scions, pruning Vines, gathering Fruit, felling Timber, dunging Land, and in all other necessary Appendices to Agriculture, that he may the better reap the Fruits of his Labour and Toyl, should be acquainted with the Influences of the Moon and Stars, as the Noble Virgil approves of in his Georgicks. And that his expectations may be the better answered, he ought in the first place to have a special regard to the state and condition of Saturn that he be not impeded or afflicted in the beginning of any Rurall affairs, for that he is the Ruler of Husbandry, and hath Dominion over all Terrene Commodities. Let him therefore (if you can so order it) be in good aspect of Jupiter or Venus well affected, not Peregrine, Retrograde, or Combust, but rather in some of his own Dignities, in good Configuration of the Moon, free from the Beams of Mars, who, in this Case ought to be weak, Cadent, Peregrine, Combust, void of all Dignity as well Essential as Accidental,

Let all manner of Grain or Corn be sowed when the Moon increases, in Signs movable, as Aries, Cancer, Libra, Capricorn, or, if she chance to be in Taurus, Virgo, Sagittarius, Pisces, let her be in Sextile or Trine of Saturn; if your Land be moist, or the Seed of a moist nature that is sowed, then let the Moon be decreasing in Virgo, Capricorn or Aries, — If your Ground be dry, and the Seed of a like condition, let the Moon be increasing in Cancer or Pisces, in good aspe to Saturn, who, together with the Moon should be in good configuration of Jupiter or Venus, — And if your Land moist

TRIGGE, 1692.

Is to be Sown be of a middle Constitution or Condition, viz. between dry and moist, it is then good to Sow it, when the Moon is in Libra well befriended.

What you intend to Plant, let the Moon be in Conjunction, Sextile or Trine of Saturn, free from the Boly or ill Beams of Mars in a fixed Sign, as Taurus, Leo, Scorpio, or Aquarius, and let her be in some aspect of Jupiter or Venus, if possible.

In planting Trees or Vines, let the Ascendant be Fixed, and the Moon placed in an Earthy Sign, as Taurus, Virgo or Capricorn, in good aspect of Saturn.

Graft or prune Trees the Moon decreasing in Aquarius chiefly and in aspect of Jupiter or Venus.

Fell Timber for Architecture from November the 22, to January 22. the Moon decreasing in Taurus, Virgo or Capricorn, and let her be in good aspect of Saturn.

Plash Hedges, fell Wood for Fowel, that the Stocks may the better grow again, the Moon increasing in Aries or Libra, chiefly in the first quarter, Jupiter or Venus assisting.

Cut Vines in December, January or February the Moon in Aries, Taurus, or Libra. --- Remove Trees when she is in the same Signs, all the last quarter in November, December, or February, and dung Land, to prevent Weeds, in the last quarter.

Good to till Gardens, to Sow and set Plants and Herbs; to set Hop-poles and make a Hop-yard, The Moon in Libra or Aquarius,

Gather Apples, and other Fruits, Herbs and Flowers, to have them large and fair, the Moon increasing toward the Full: to keep and preserve them in store, gather them dry, the Moon decreasing, in aspect of Jupiter or Venus.

Shear Sheep, cut Grass for Hay, the Moon increasing, so it will Spring again the sooner.

Kill Fat Swine near the Full, the Fat will endure boyling the better, and waste less then if kill'd at other times.

Gold Cattle, knit Lambs, the Moon decreasing free from the beams of Saturn or Mars, and in some aspect of Jupiter or Venus,

Set Beans or Pease in the New Moon, and they will ever be blooming, and so run all up into Stalks: This is affirmed by that excellent Philosopher, Sir Ch. Heydon, in his admirable Defence of Astrology.

TRIGGE 1692.

Of the ECLIPSES which will Happen in this Year
of our Lord 1692.

If that known Rule in *Astronomy* holds true, viz. — That every New Moon where the North or South Node of the Moon are within sixteen degrees of the Conjunction, the Sun will be Eclipsed in one part or other: And that every Full Moon the Sun happens to be within ten degrees of either Node, the Moon will then also suffer an Eclipse. — I say, if this Rule be right, we shall have no less then five Eclipses this Year 1692.

The First will be of the Moon on *January 23* at our Two of the Clock in the *Afternoon*, and therefore invisible as to us. It happens in 14 degrees of *Aries*, the Moon Eclipsed in the Sun's Domal Dignity, *Astrologers* know what it means, but I pass no Judgement upon it.

The Second will be of the Sun on *February 9*. at 3 a Clock in the Morning, inconspicuous also to us, It happens in the latter part of *Aquarius*; *Saturn* governs the place defective.

The Third will be of the Moon on *July 18*. near our 4 in the morning, and may in part be seen in our Horizon, if the Air be clear. It is celebrated in 6 degr. of *Aquary*. *Saturn* rules this also.

The Fourth will be an Eclipse of the Sun on *Aug. 2*. about our 9 in the morning, in 20 degr. of *Aries*, viz. near the place of the great conjunction of *Saturn* and *Jupiter* (triple repeated) in 1682. and 1683. the Effects thereof will be very great and amazing: I want room to interpret their stupendious Portents.

The Fifth and last will be of the Sun on *Decemb. 27*. about two hours after noon. It happens in 17 degrees of *Capricorn*, and hath *Saturn* for his Governour.

When *Saturn* claims Dominion in an Eclipse, Conjunction, Solar Ingress, &c. the World will be sure to meet with Saturnine Effects or Influences, *Mars* hath long Ruled the Roast, and carv'd his way thorow the World with violence, writing his Resolutions in Scarlet Characters in most Nations of Europe. And yet Gods anger is not turned away, his Hand is still stretch'd out against us. When *Mars* hath finished his destructive Errand, Lo! *Saturn* is ready to enter the Scene...

Bella Famem, Pestemque Fam. & Mortalibus affer.;

TRIGGE 1692.

War, Famine brings; and Famine, Pestilence.
We have not yet been punish'd enough for our Scarlet-bloody
Crime, of that never to be forgotten Year 1648.

— If Common Blood can Cry,

How much more Loud will that of Royal Dy?

The envious planet Saturn will bring up the Rear of Europe's troubles; His very Countenance would make us fear his Influences; Hear how the Philosopher describes him, viz.

———— Saturn's sullen Face,
Pale, and of Asby Colour, Male Content,
A Cataline to Mortal Temperament.
That would blow up the Capitol of Man:
With Envious Influence; Melancholy, Wane;
And, if there Haue he in a Heavenly Breast,
This Planet with that Fury is possess.

Which dismal Saturnine Character is not Lessned, but Enlarged rather by the Excellent Dubartus, as curiously Translated by Joshua Sylvester thus —————

Grim Lean-fac'd Famine! Foul Infectious Plague!
Blood Thirsty War! and Treason's Hateful Hag!
Here pouring down Woes Universal Flood,
To Drown the World in Seas of Tears and Blood,

But to draw my Pen from this terrifying Theam, let me put every true Christian in mind, that the Starry Edicts are not like to the Medean Laws, unalterable, there is an Amulet very powerful to be used against them, which is the true Armory of the Church, viz. Prayers and Tears, which to a sure will much lessen, if not wholly abate all Planetary Menaces. Let us therefore first confess our Crimes against Heaven, be truly sorrowful for them, and resolve never to incur the like again. And next, let us most heartily in the fear of God betake us to our Litany, and pray, — From Plague, Pestilence and Famine, Libera Nos Domine.

Of the Four Seasons of the Year, with their Nature, and Description, &c.

1. Of the Spring.

THE Spring Quarter, the most pleasant and delightful Season of the whole Year, constantly begins when the Radiant Sun (that glorious

TRIGGE 1692.

Glorious Lamp of Heaven, that Type of God, the visible Deity, 160
Eye and Soul of the whole World) Enters into the Equinoctial Sign
Aries, the first and chief sign of the Zodiack, thereby renewing his
course to us, and reviving not only the souls and spirits of Men, but
also of Plants, Vegetables, Minerals, &c. then making the Dayes
and Nights of equal length. And to us that Inhabit of this side the
the Equator, he begins to increase the quantity of Sun-shine, and to
decrease the Proportion of Shadow; Or, which is all One, he begins
to make the Dayes longer, and Nights shorter to us.

This salubrious Season begins this Tear in the Horizon of London,
upon March 9. near One of the Clock, Afternoon, the Regal Sign Leo
rises in the East, and the Glorious Planets Jupiter, Venus and the
Moon illustriously Adorn the Mid heaven, bringing great Honour
and Awe unto Governours, Kings, Princes and Emperours, &
which we pray God to increase. For such Men as make it their
business to Lessen or Impair the Power of Gods Vicegerents, (if they
would speak out) think cheaply of the Deity, may scarce believe there
is a God. Let them be Reckon'd among the Number of the Right
Prophets Fools, as justly they deserve. The square of Saturn and
Mercury bodes ill Weather to Anti-Monarchists, and will make them
sensible that the World is now under the Influence of a Conjunction
of Saturn and Jupiter in Leo, a Monarchical and Imperial Sign,
whose Triple Oppositions now hasten apace.

This Season is naturally hot and moist, and therefore most
favourable to Youth, and to those of sanguine Complexion
and Humours. It is the most temperate and healthful time of
the Year, and is therefore by Physicians esteem'd the most
proper time to give Ease to diseased Bodies, and to restore to
Health again such as have been macerated or decayed by Dis-
tempers! Nature helps the Physician and Physick both at
this time. The Infirmities of this Quarter are Melancholy, Ep-
ilepsy, Frenzie, Hemorrhagies, Hoarseness, Coughs, Itch, Scabs, Ul-
cers, Imposthumes, Gouts and Rheumatismes, Pleurisies, Dropsies,
Agues, Feavers, Asthmaes, pains in the Head and Eyes, Fainting,
Meagrimis, and the like. Thus much may suffice for the Spring-
quarter.

II. Of the Summer-quarter.

The Summer-season ever Commenceth where the Spring
ends

TRIGGE 1692.

ends, viz, when the Sun having passed *Aries*, *Taurus*, *Gemini*, toucheth the first Scruple of the Tropical sign *Cancer*, at which time (as being then at his greatest distance from the Earth) he makes the largest Dayes and shortest Nights to all that inhabit these Northern parts of the world. And this most comfortable and refreshing Season, beginning this Year on *June* the tenth day a little after three a clock P.M. At which time, (as some blasphemous Knaves and Fools call it) the stigmatized sign *Scorpio* ascends the Horizon, and *Mars* Lord thereof is in the Mid-heaven, in Conjunction of *Venus*, and sextile of *Mercury*. The Moon rises into the *Medium Cali*, and *Saturn* and *Jupiter* are a partill opposition. The Mid-heaven is the scene of *Action* again. Great, Glorious, but stupendious *Actions* are at Hand. Let them turn to the Glory of God, and that love the truth. *Obedience is better then sacrifice.*

This Season is Hot and Dry, and naturally Affimulated to *Choler*. Two phlegmatick Persons are most vigorous and healthy, and the *Cholick* most subject to *Distempers*. Elderly persons are likewise at this time Active and lively, but Youth or young people, by reason of the excess and Boiling of the Blood and spirits, are aptest to *Intemperance* and so Exposed to *Surfeits*, *Faavers*, *Pleurisies*, *Corruption of Blood*, *Consumptions*, &c. *Burning Agues*, *Impostumes*, *Dizziness*, pains in the Head, *Frenzies*, and the like. It was he Saying of the learned *Cardan*, --- *Morbos olimus, sed accersimus.*

III. Of the Autumnal Quarter:

The Autumnal or Harvest-quarter begins where the Summer ends, viz. when the Sun having Finished his perambulation through the second three signes of the Zodiack, *Cancer*, *Leo*, *Virgo*; then entering the first Point of *Libra*. the Autumnal Equinox, there waiting Days and Nights equal all the World over, under the Poles excepted, as he did at the beginning of the Spring. At this time the Nights begin to exceed the days in length, and all things sensitive and vegetative begin to lose their strength and glory, and hasten to a decay according to the Decree of Nature.

This Season beginneth this Year on September the 12th. day about five in the Morning, in the Meridian of London, at which time *Virgo* arises in the Horoscope, and *Jupiter* is in the Mid-heaven in *Platique*

Trine

TRIGG 1692.

Trine to Mars, Mercury and the Moon 'Tis a Glorious Position for Monarchs, Monarchy, &c. But the Moon in the first Angle denotes a Sickly Season, quod Deus avertat.

The quality of this quarter is cold and dry, and assimilated to Melancholy amongst the Humours. Young persons are now most Active and in Health, and those of Phlegmatick Constitutions, Elderly Melancholy persons, the contrary. The Diseases that commonly Reign (with us) in this quarter, are Megrims, Epilepsies, Jaundice, Oppilations of the Spleen, Difficulty of Breathing, Convulsions, Boyles, Gouts, Dropseys and sundry others, which call for the Physicians Care to correct and remedy.

IV. Of the Winter Season,

The Brumal or Winter-quarter ever initiates where the Autumn ends, viz. when the Sun having Transited the three Harvest Signs of Libra, Scorpio, Sagittary, doth Enter the first Minute of the Southern Tropic Capricorn; At which time having Finished his greatest Southern Declination, he begins to approach us again, that inhabit these Northern parts. The Diurnal Arch of the Sun, (or his stay above the Earth) is now but small, and his Nocturnal Arch very great, making the shortest Days and longest Nights to us. The Heat or Solar Warmth is now at the lowest, and Cold begins its Regency, and Tyrannizeth all this Season to purpose.

This Melancholy Quarter begins this Year with us on December the tenth day, near 7 h. P.M. or Afternoon. At which time the Noble Sign Leo Ascends the Horizon, the Moon is in the Mid-heaven with the Pleiades; Saturn and Mars are both in Opposition of Jupiter, and he in Detriment very weak. It is a Scheme that deserves a Comment, but is not very easily Interpreted. I shall only say thus much by way of Caution to busie turbulent Spirits, which I foresee will at this time be stirring. --He that looks on the Sun only to discover spots, is deservedly blinded by his Beams.

The Quality of this Season is Cold and Moist, quite opposite unto that of the Summer. The Youthful and Choleric

T R I G G E 1692.

lerick People are best in Health; but it proves unkind and very unwelcome to the Aged and Phlegmatick. The Diseases which commonly Accompany this Quarter, are, Coughs, Hoarseness, Catarrhs, Sciatica, Gout, Melancholy, Sore Eyes, Scurvey, Spleen, Epilepsies, and all other Diseases which proceed from Corruption of Humours, together with sundry kinds of Sickneses incident to the Female Sex, which Modesty forbids Me to Name. Thus much for the Four Seasons and whole Year of 1692.

F I N I S.

ADVERTISEMENT.

Mr. Edmund Cook of Waltham Abbey in Essex, having (by Gods Blessing upon his Endeavours) Cured many of the *Scrophula*, or *Evil*, given over by Others, continues his Practice thereof, for the benefit of such as are miserably Afflicted with the said Disease, at his House at Waltham aforesaid.

The *Astrological Seaman* mentioned in our last Years *Calendarium Astrologicum*, is not yet made publick, for some particular Reasons: But the Author (having something Material to Add thereunto) designs to have it Publish'd, with his xxi. Yeares Diary of the Weather Annexed thereunto, by the latter End of this Year 1692, or beginning of the next Year at farthest.
